**Overview**

SITRANS LR200 is a 2-wire, 6 GHz pulse radar level transmitter for continuous monitoring of liquids and slurries in process vessels including high temperature, pressure, agitation, and turbulence to a range of 20 m (65 ft).

**Benefits**

- Graphical local user interface (LUI) makes operation simple with plug-and-play setup using the intuitive Quick Start Wizard
- LUI displays echo profiles for diagnostic support
- Communication using HART or PROFIBUS PA
- Process Intelligence signal processing for improved measurement reliability and Auto False-Echo Suppression of fixed obstructions
- Programming using infrared Intrinsically Safe handheld programmer or SIMATIC PDM

**Application**

SITRANS LR200's unique design allows safe and simple programming using the Intrinsically Safe handheld programmer without having to open the instrument's lid. It also features a built-in alphanumeric display in four languages.

The SITRANS LR200 has a standard Uni-Construction polypropylene rod antenna that offers excellent chemical resistance and is hermetically sealed. The Uni-Construction antenna features an internal, integrated shield that eliminates vessel nozzle interference.

Startup is easy with as few as two parameters for basic operation. Installation is simplified as the electronics are mounted on a rotating head that swivels, allowing the instrument to line up with conduit or wiring connections or simply to adjust the position for easy viewing. SITRANS LR200 features Process Intelligence signal-processing technology for superior reliability.

- Key Applications: liquid process vessels with agitators, vaporous liquids, high temperatures, asphalt, digesters

**Configuration**

**Installation**

- Min. 300 mm (1 ft) for every 3 m (10 ft) of vessel wall.

**Note:**

- Beam angle is the width of the cone where the energy density is half of the peak energy density.
- Beam angle for horn antenna dependent on horn size.
- The peak energy density is directly in front of and in line with the rod antenna.
- There is a signal transmitted outside of the beam angle; therefore false targets may be detected.

**Mounting unit on vessel**

- Conical
- Flat
- Parabolic

**Mounting unit on stilling well**

- Orient front or back of device toward stillpipe slots.

**Mounting on a nozzle**

- Min. 10 (0.4)

**Beam angle**

- Rod: 28°
- 4" horn: 29°
- 6" horn: 20°
- 8" horn: 17°

**Beam angle for horn antenna dependent on horn size**

- Min. 10 (0.4)

### Frequency

- Mode of operation: Radar level measurement
- Frequency: 5.8 GHz (North America 6.3 GHz)
- Measuring range: 0.3 ... 20 m (1.0 ... 65 ft)
- Output: Analog output 4 ... 20 mA
- Accuracy: ± 0.02 mA
- Span: Proportional or inversely proportional
- Communications: HART
- Fail-safe: Programmable as high, low or hold (Loss of Echo)

### Performance (according to reference conditions IEC60770-1)

- From end of antenna to 600 mm: 40 mm (1.57 inch)
- Remainder of range: 10 mm (0.4 inch) or 0.1 % of span (whichever is greater)

### Rated operating conditions

#### Installation conditions
- Location: Indoor/outdoor
- Ambient conditions (enclosure):
  - Ambient temperature: -40 ... +80 °C (-40 ... +176 °F)
  - Installation category: I
  - Pollution degree: 4

#### Design

| Enclosure | Aluminum, polyester powder coated |
| Cable inlet | 2 x M20 x 1.5 or 2 x ½" NPT |
| Degree of protection | Type 4X/NEMA 4X, Type 6/ NEMA 6, IP67, IP68 |
| Weight | < 2.82 kg (6.21 lb) (polypropylene rod antenna) |
| Display (local) | Multi-segment alphanumeric liquid crystal with bar graph (representing level) available in four languages |
| Antenna | Polypropylene rod, hermetically sealed construction, optional PTFE |
| Dimensions | Standard 100 mm (4 inch) shield for maximum 100 mm (4 inch) nozzle, or optional 250 mm (10 inch) long shield |
| Optional rods and horn | Refer to SITRANS LR200 Antennas for optional rods and horns |
| Process connections | 1½" NPT ([Taper], ANSI/ASME B1.20.1) |
| Process connection | R 1½" ([BSPT), EN 10226], or G 1½" ([BSPP), EN ISO 228-1)] (polypropylene rod antenna) |
| Flange connection | Refer to SITRANS LR200 Antennas for more connections |

#### Medium conditions

| Dielectric constant $\varepsilon_r | > 1.6 (for $\varepsilon_r < 3$, use stillpipe) |
| Vessel temperature and pressure | Varies with connection type; see Pressure/Temperature curves for more information |

### Power supply

- 4 ... 20 mA/HART
- General Purpose, Non-incendive, Intrinsically Safe: Nominal 24 V DC (max. 30 V DC) with max. 550 Ω
- Flame proof, increased safety, Explosion proof: Nominal 24 V DC (max. 30 V DC) with max. 250 Ω
- PROFIBUS PA:
  - 10.5 mA
  - Per IEC 61158-2

### Certificates and approvals

#### General
- CSA, CE, FM, RCM
- Lloyd’s Register of Shipping
- ABS Type Approval
- FCC, Industry Canada, and European (R&TTE), RCM

#### Marine
- INMETRO Ex ia IIC T4 Ga
- CSA/FM, Class I, Div. 1, Groups A, B, C, D; Class II, Div. 1, Groups E, F, G; Class III, T4
- CSA/FM, Class I, Div. 1, Groups A, B, C, D; Class II, Div. 1, Groups E, F, G; Class III, T4

Operating Instructions for PROFIBUS PA device

English Article No.
A5E32337680
German Article No.
A5E34942820

Note: The Operating Instructions should be ordered as a separate item on the order.
All literature is available to download for free, in a range of languages, at http://www.siemens.com/ processinstrumentation/documentation
This device is shipped with the Siemens Level and Weighing manual DVD containing the ATEX Quick Start and Operating Instructions library.

Accessories

Handheld programmer, Intrinsically safe, EEx ia
HART modem/USB (for use with a PC and SIMATIC PDM)
One metallic cable gland M20 x 1.5, rated -40 ... +80 °C (-40 ... +176 °F), HART
One metallic cable gland M20 x 1.5, rated -40 ... +80 °C (-40 ... +176 °F), PROFIBUS PA
One general purpose polymeric cable gland M20 x 1.5, rated -20 ... + 80 °C (-40 ... +176 °F)
SITRANS RD100, loop powered display - see Chapter 7
SITRANS RD200, universal input display with Modbus conversion - see Chapter 7
SITRANS RD300, dual line display with totalizer and linearization curve and Modbus conversion - see Chapter 7
SITRANS RD500 web, universal remote monitoring solution for instrumentation - see Chapter 7
For applicable back up point level switch - see point level measurement section

1) Available with communication option 3 only
2) Product shipped with plastic cable gland, rated to -20 °C.
If -40 °C rating required, then metallic cable gland is recommended.
## Level Measurement

SITRANS LR200

Dimensional drawings

SITRANS LR200 with polypropylene shielded rod antenna

- 1/2" NPT cable entry (or alternatively M20 x 1.5 cable gland)
- Threaded cover
- Enclosure/electronics
- Locking ring
- Reference point
- Mounting thread
- Polypropylene rod antenna

- Standard: 100 (4)
- Optional: 250 (10)

PTFE rod antenna, threaded

- Reference point
- AISI 316, 2" NPT, R 2" (BSPT) or G 2" (BSPP)
- Active antenna (PTFE)
- Shield Length (S.L.):
  - Standard: 100 (4)
  - Optional: 250 (10)

Threaded connection PTFE rod, external shield

- Reference point
- AISI 316, 2" NPT, R 2" (BSPT) or G 2" (BSPP)
- Assembly Length (L):
  - Standard: 575 (22.6)
  - Option: 725 (28.5)

Horn antenna with flat faced flange

- Enclosure/electronics
- Nameplate
- Reference point
- Locking ring
- Flange
- Horn

- Standard: 111 (4.40)
- Option: 100 (4)

Sliding waveguide

- Nameplate
- Reference point
- Sliding flange

- Standard: 100 (4)
- Option: 150 (6)
- Fully inserted length = 934 mm + horn height

SITRANS LR200, dimensions in mm (inch)
SITRANS LR200 connections

Connect the wires to the terminals as shown: the polarity is identified on the terminal block.

Notes:
1. DC terminal shall be supplied from an SELV source in accordance with IEC 1010-1 Annex H.
2. All field wiring must have insulation suitable for rated input voltages.
3. Use shielded twisted pair cable (14 ... 22 AWG) for HART version.
4. Separate cables and conduit may be required to conform to standard instrumentation wiring practices or electrical codes.

Shield for HART and PROFIBUS PA intrinsically safe versions only.

Hand programmer

Part number:
7ML1930-1BK
